# The rise of the regions

## Rise of the regions

**60%**

of Australians who don't currently live in a regional area have considered moving to a regional area

**42%** are attracted to the idea of moving away from the city but retaining a city job

Looking to the future, the focus on Australia's regions is rising with three in five Australians who don't currently live in a regional area (60%) having considered moving to one. In fact, more than a third have strongly/somewhat considered it (36%). The property data from the last year reflects this with dwelling values in capital cities rising by 9% compared to a 15% increase for regional markets.<sup>11</sup>

# Younger Australians are driving the rise of the regions

## **Younger Australians driving the rise of the regions**

Younger Australians are more likely than their older counterparts to be attracted to the idea of moving away from the city but retaining a city job (59% Gen Z, 56% Gen Y cf. 46% Gen X, 19% Baby Boomers, 13% Builders).

# Younger Australians are driving the rise of the regions

## Return to local

% who value more now than three years ago

**66%** Shopping locally

**58%** Walkable community

**53%** Strong local community

# Gen Z and culture

Younger generations are more positive about their workplace's effectiveness at creating a culture that is inclusive of all generations than their older counterparts (68% Gen Z, 63% Gen Y cf. 60% Gen X, 49% Baby Boomers). Similarly Gen Z (65%) is more likely than other generations to believe their workplace is extremely or very effective at valuing the experience and wisdom of older staff (cf. 56% Gen Y, 52% Gen X, 53% Baby Boomers).

# The future of employment

When considering their ideal working conditions, three in five Australian workers (62%) see a hybrid model as their ideal arrangement, incorporating a mix of working from home and the workplace. One in four (25%) want everyone working from the workplace all the time, while just 14% see their ideal as everyone working from home all the time.

## THE FUTURE OF WORK WILL BE HYBRID

# How students view their future career

Members of the emerging workforce are part of a values-driven generation. As Gen Z students think about their future career, the most important (extremely/very) considerations for them are that they have purpose and meaning in their work (72%) followed by an alignment between their work and their core values (68%).

In keeping with their social and mobile outlook on life, today's students believe it is important that their future career involves a workplace where there is a community of strong social connections (65%) alongside workplace flexibility (64%).

The desire to live a life of impact is strong, with almost two in three students (64%) believing it is extremely/very important that the work they do has a positive impact on the world around them.<sup>10</sup>

**76%**

are making an effort to  
avoid a sedentary lifestyle

# The wellbeing era

# The most important wellbeing elements of a workplace are...

Our research into [work wellbeing](#) found that the most important elements of a workplace are:<sup>7</sup>

**72%**

Work wellbeing

**65%**

Relationships with peers/colleagues

**60%**

Collaborative work environment

**60%**

Flexible working hours

**58%**

Inspiring & accessible leadership

From demographic shifts to technological advancements **the future of work is changing.**

Yet our research shows that the health, stress, and relational connection of workers — **wellbeing** — is the essential factor that will most impact and define the future of work.

**Only occasionally in history do massive demographic changes combine with huge social shifts, ongoing generational transitions and unprecedented technological innovation so that within the span of a decade society altogether alters. Australia is currently in the midst of one such transformation.**

What does this mean for leaders?

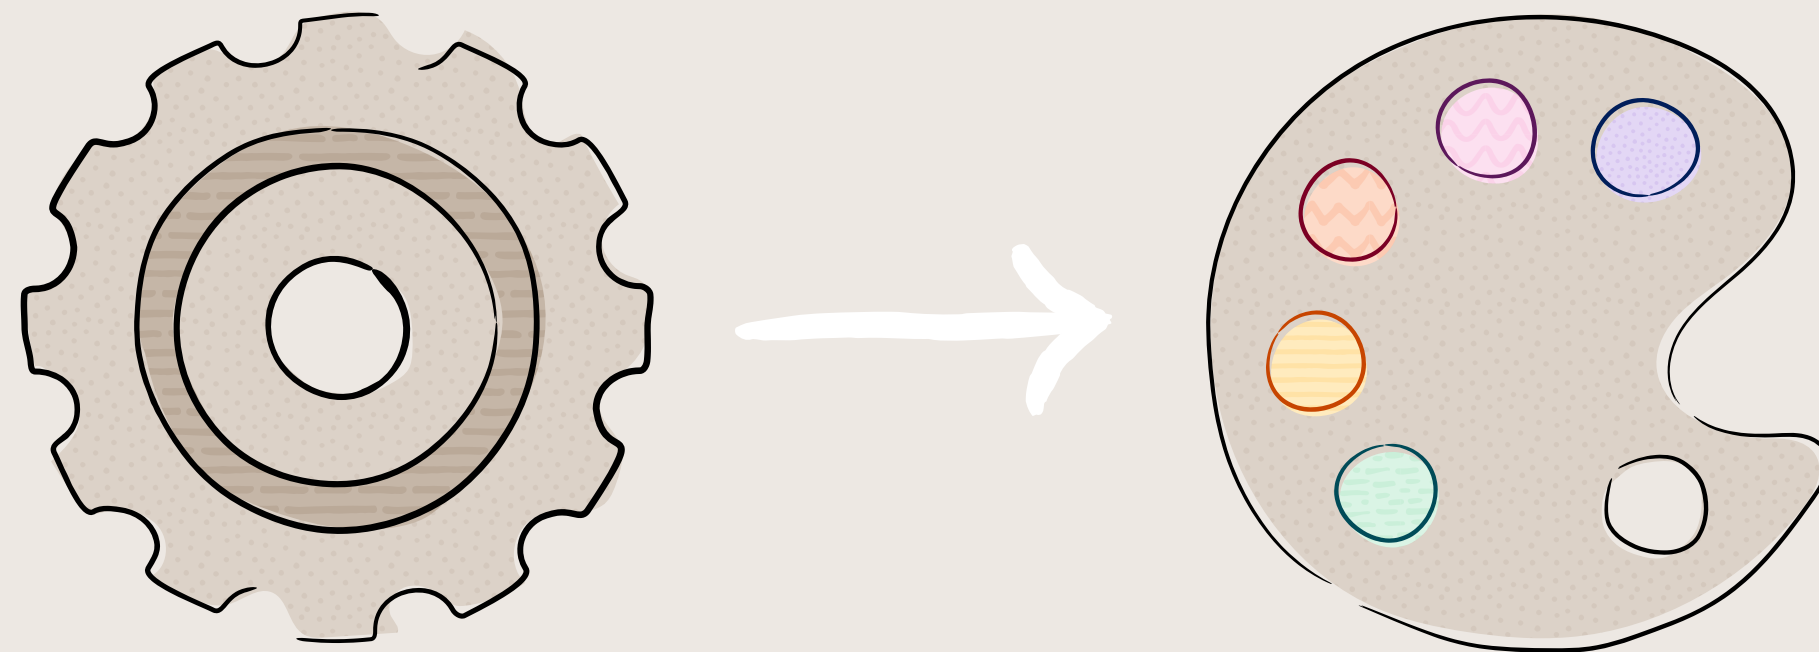

**The success of a leader is measured not by what they achieve in their tenure, but by what they set in motion.**

## The trends of 2023

6

### From industrial to artisan

A counter-trend from mass production to quality, niche and unique.  
Workers too are looking to be creative and fully engaged in work which contributes value.

7

### Rise of the intrapreneur

People are searching for meaningful careers and a sense of ownership, but without the risk and cost of their own organisation. Meet the intrapreneur, highly engaged and innovative like the entrepreneur but works in an organisation.

## The trends of 2023

### HumanitAI

AI is at its best when humans are in the loop.  
Like any mainstream technology, AI will be used to enhance human flourishing.

## The trends of 2023

1

### Recessionette

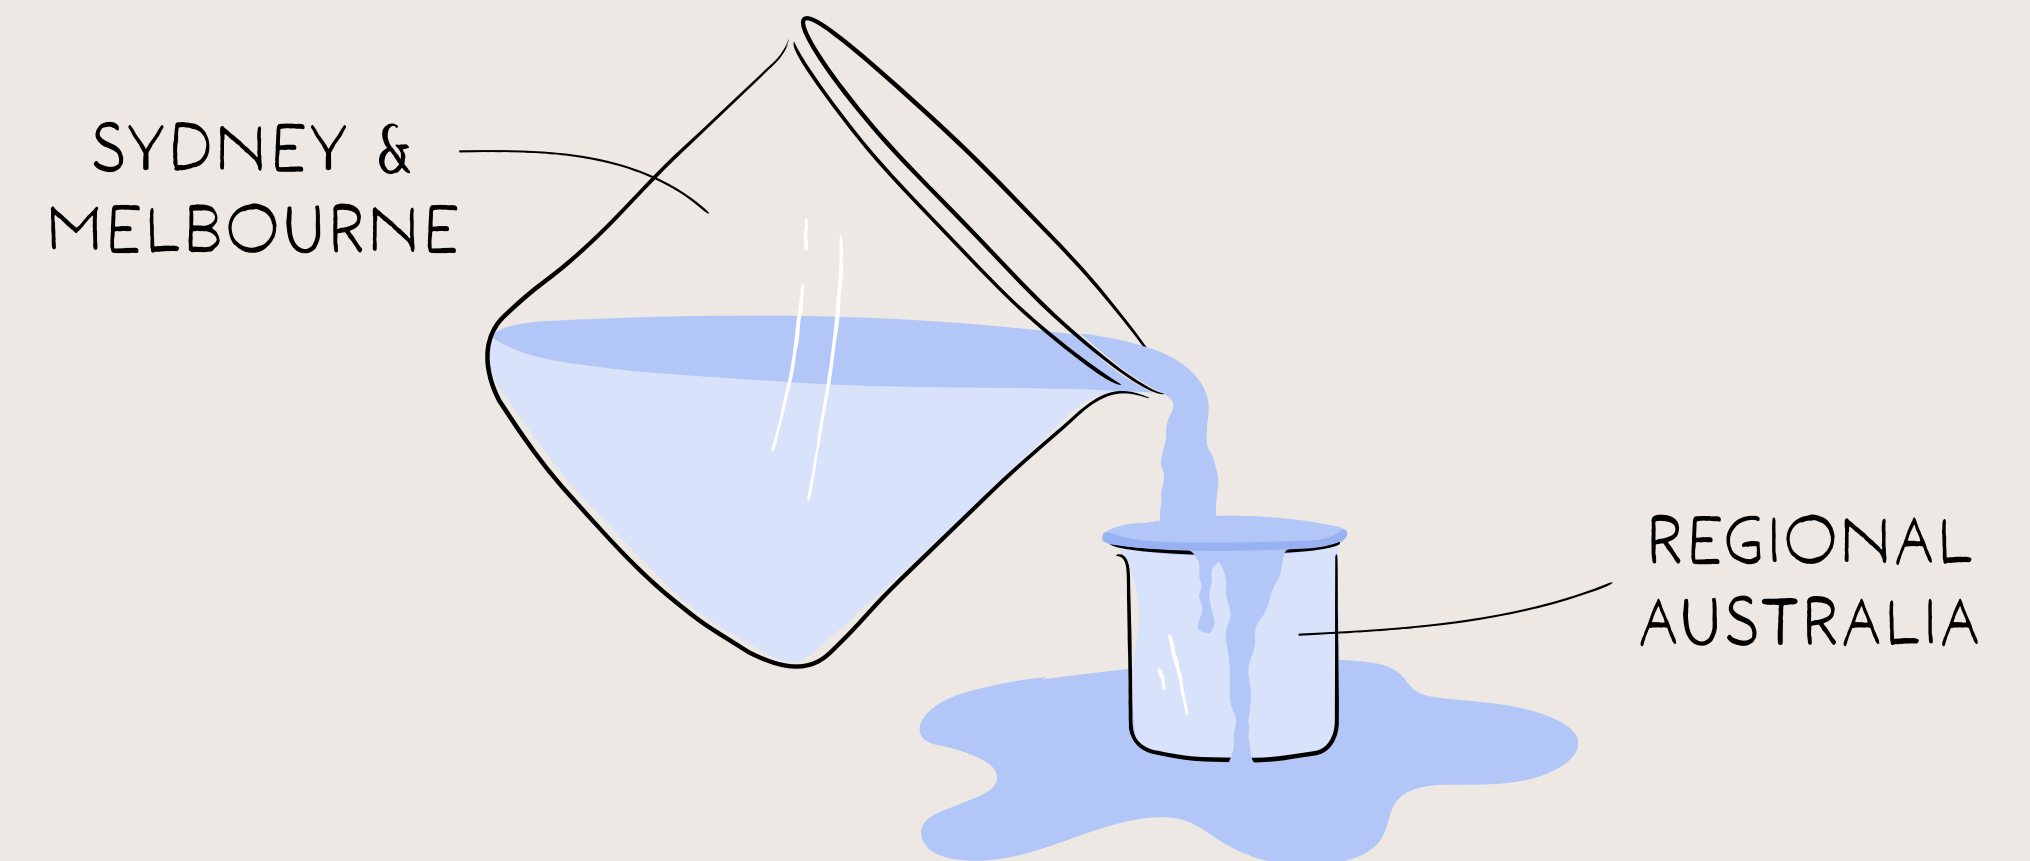

Whether or not we enter a technical recession, from a consumer perspective it already feels like one. Consumer sentiment is being significantly impacted by a multitude of headwinds and impaired sentiment leads to reduced future spending.

2

### Population growing pains

Large scale, rapid, population movements since COVID from capital cities to regional areas is bringing opportunities but also growing pains.
