Since 2002, the Australian Government has worked in partnership with eminent child health research institutes, the Centre for Community Child Health at The Royal Children's Hospital and the Murdoch Children's Research Institute, and The Kids Research Institute Australia to deliver the Australian Early Development Census program to communities nationwide. The Australian Government continues to work with its partners, and with state and territory governments to implement the AEDC.

This infographic uses data from the Australian Early Development Census (AEDC). The AEDC is funded by the Australian Government Department of Education. The findings and/or views reported are those of the author and should not be attributed to the Department or the Australian Government.
