The Department for Education Further Education and Pathways directorate is responsible for the development of the supporting initiatives outlined in the VET for School Students policy. These include:

1. Development of the Flexible Industry Pathways, including new industry areas.
2. Development of enterprise and employability skills training within SACE units.
3. Improved processes and procedures for flexible apprenticeships and traineeships for school students.
4. Development of streamlined funding arrangements for schools.
5. Working with the Commonwealth government to develop My Future website.
6. Access to industry and employers for immersion during school through an online platform.
7. WOW challenge guidelines and resources.
8. Streamlined processes for work placements and work experience.
9. Development of ePortfolio application for students to document their achievements.
10. Development of online community forum.

Where possible we will consult with schools on the development of these initiatives.

In addition, the following enabling activities will be progressed through implementation to support schools.
