WELLBEING FOR LEARNING AND LIFE

A framework for building resilience and wellbeing in children and young people
Position statement

The Department for Education is committed to giving every child every chance to have the best start in life.

Supporting children and young people’s development and wellbeing requires a commitment from the whole of society. The Department for Education works together with other government agencies, community and local government partners to support wellbeing in education and health, the home and community environments. This partnership recognises children and young people and their families as central partners and active agents in their own lives and the lives of others.

Wellbeing means having good or satisfactory conditions of existence – in health, happiness and prosperity. It is a complex set of interrelated factors and not a tangible thing that exists in isolation. Wellbeing is about how we are doing and how we feel. Are we healthy? Do we feel safe? Do we feel like we belong? Do we have a positive sense of identity? These are some of the factors that make up our wellbeing.

A holistic approach to children and young people’s development sets the trajectory for lifelong wellbeing outcomes. It encompasses many sides of life: social, cognitive, emotional, physical and spiritual.

A state of wellbeing is enhanced by positive psychology (the scientific study of the strengths that enable individuals and communities to thrive) and by building protective factors and resilience that helps to respond to adversity and enjoy fulfilling life experiences.

Principles

The principles underpinning the Wellbeing for Learning and Life framework are:

Child-centred – Incorporating the voices of children and young people at all stages of development in our education and care settings will inspire participation and decision making for learning success

Strengths-based – Strengths-based approaches effectively engage and support children, young people and their families, enabling growth and learning

Learning success – Participation in learning and experiencing learning achievement is integral to wellbeing. Promoting wellbeing and high expectations will empower successful learning.

Relationships – Respectful relationships enhance wellbeing. Building trust and care will inspire and engage children, young people and their families to learn, grow and achieve.

Inclusion – Valuing diversity, individual capabilities and unique interests will empower children and young people to have equal rights and opportunities in all contexts of life.

Wellbeing and learning

The Wellbeing for Learning and Life framework is applicable across all areas of children and young people’s lives but also recognises the significant impact of education and care settings with links to the Australian Curriculum, SACE and Early Years Learning framework provided within the document.

Wellbeing is a critical part of how young people learn and grow. Research shows that children’s wellbeing affects their ability to engage with their education. It is also a lifelong outcome of learning – those that engage more with education are more likely to experience greater wellbeing as adults.

Learning that is intentionally designed to challenge and stretch learners enhances their wellbeing. When learners are supported to see a perception of ‘failure’ as an opportunity to learn they will feel safe to experiment, to question, and to challenge themselves and others in their learning.

Every South Australian child and young person deserves the opportunity to be their best in life. The Department for Education supports the learning and life opportunities of all children and young people, and seeks to help make them strong, creative and resilient learners, to set the trajectory for lifelong wellbeing.

“Learning and wellbeing are closely linked. Children and young people with good wellbeing are more engaged and successful learners. Likewise gaining a good education is a key contributor to positive lifelong wellbeing outcomes.”
A commitment to inclusion

We aim to improve wellbeing for all of South Australia’s children and young people regardless of their age, abilities, geographical location, gender identity, sexuality, religion, culture or means of participation. This means giving special attention to those who live in priority circumstances. This might mean living with disability, with mental health issues, living in out-of-home care or being homeless, or identifying as refugees or asylum seekers.

Priority circumstances also include young people incarcerated in the juvenile justice system, living in poverty or low socio-economic circumstances, learning English as an additional language, living with domestic violence and abuse, who have experienced trauma or compounded disadvantage or who are under the guardianship of the Minister, and those who are young and very young.

Celebrating Aboriginal children and young people

We recognise that South Australia’s Aboriginal peoples are part of the oldest continuing cultures in human history and the cultural and linguistic heritage of Aboriginal children and young people must be honoured, celebrated and respected.

Aboriginal children and young people in South Australia are over-represented in experiencing serious and widespread barriers to learning and wellbeing.

The principles described in this framework aim to redress the inequity Aboriginal children and young people experience in child protection, health and education.
We will promote the wellbeing and resilience of children and young people by inspiring, engaging and empowering.

**Experiences**
Create fulfilling learning and life opportunities.
Children and young people are engaged as active agents in their own lives and the lives of others.
We help provide fulfilling learning, life and holistic development opportunities according to individual abilities and interests through all ages and stages of life from birth through to adulthood.

**As individuals**
Enhance individual practices.
Staff inspire children and young people to thrive through their professional practices.
We support children and young people to feel respected, valued, have life aspiration and believe in their own potential.

**Together**
Build inclusive & welcoming services.
Services foster a sense of belonging for families through welcoming environments.
We make sure our spaces are inclusive, friendly, built on partnerships and we harness local strengths.

**Capabilities**
Build a positive sense of self and individual abilities.
Children and young people are empowered to succeed and realise their goals.
We help them to build resilience and develop characteristics that promote a positive sense of self and individual abilities.

**Connections**
Promote respectful interactions and meaningful relationships.
Children and young people are better connected to the world around them and to a support network of people.
We enhance characteristics that enable respectful and meaningful interactions and relationships.

**ENGAGE**
Engaging children and young people through developmental opportunities

**INSPIRE**
Inspiring children and young people through our people and services

**EMPOWER**
Empowering children and young people’s positive wellbeing and resilience
Putting the wellbeing framework into action

Staff and services that we provide foster wellbeing by displaying a number of characteristic in their day-to-day activities at school, preschool, childcare or health services.

The 6 ‘Experiences’ have been developed for and are consistent with the Community Goals from the The Department for Education Child Friendly SA Implementation Guide: A step by step guide to gaining UNICEF Australia Child Friendly Recognition, Government of South Australia. They are also consistent with The Nest national plan for child & youth wellbeing developed by the Australian Research Alliance for Children and Youth (ARACY).
Empowering the capabilities we build and connections we promote, linked to the Early Years Learning framework and the Australian Curriculum

Both the Early Years Learning framework (EYLf) and the Australian Curriculum recognise the importance of wellbeing and the link to personal and social competence, health and literacy and numeracy. The EYLf explicitly includes wellbeing in Learning Outcome 3: Children have a strong sense of wellbeing. This includes promoting children to become strong in their social and emotional wellbeing, and children taking increasing responsibility for their own health and physical wellbeing (see pages 30-32 of the EYLf for further guidance). The Australian Curriculum builds on the learning outcomes of the EYLf and supports students to make decisions that enhance and promote personal health and wellbeing as part of the health and physical education learning area.

### Empowering: Capabilities we build

#### Paying attention

The moment-by-moment control of attention, to be in the present moment and focus on certain stimuli while filtering out others

- attention
- awareness
- mindfulness
- meditation
- focus

<table>
<thead>
<tr>
<th>Self awareness</th>
<th>Self management</th>
</tr>
</thead>
<tbody>
<tr>
<td>Understand themselves as a learner</td>
<td>Develop self-discipline and set goals</td>
</tr>
</tbody>
</table>

Learners understand and are self-aware of their strengths, preferences for learning and areas for improvement.

Learners identify what they don’t know, in order to expose themselves to new ideas and experiences.

Learners are self-determined, can develop their own goals and challenge themselves to achieve their personal best.

- Expressing wonder and interest
- Showing curiosity and enthusiasm for learning
- Investigating, imagining and exploring ideas

#### Understanding your emotions

This includes present moment experiences of emotion, identifying of emotions and emotional associations

- positive and negative emotion
- positive affect
- mood
- facial and emotion expression
- reactivity

<table>
<thead>
<tr>
<th>Self awareness</th>
<th>Self management</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recognise emotions</td>
<td>Express emotions appropriately</td>
</tr>
</tbody>
</table>

Learners know and understand strategies for thinking, learning and problem solving. They understand the notion of ‘productive struggle’ and they see their mistakes as important aspects of learning.

Learners are willing to ‘step in’ and have a go at complex unfamiliar tasks and find multiple ways to problem solve and develop their conceptual understanding.

- Showing an increasing capacity to understand emotions
- Self-regulating emotions
- Understanding the feelings and needs of others

#### Coping with stress

The ability to cope effectively with adversity and skills to support this

- resilience
- coping
- post-traumatic growth
- adversity
- hardness
- adjustment

<table>
<thead>
<tr>
<th>Self management</th>
<th>Self awareness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Become confident, resilient and adaptable</td>
<td>recognition of warning signs</td>
</tr>
</tbody>
</table>

Learners have a belief in themselves, they use their strengths to have a go and say ‘I can do this’.

Learners look forward to getting feedback from others to help them take the next step.

Learners develop skills for learning in different ways, they talk with others about how they learn best, and share tips that work well when they are facing a challenge.

- Accepting challenges
- Making choices
- Managing change
- Coping with frustrations
- Dealing with the unexpected

---

**Wellbeing Framework for Learning and Life**
